

A graphic illustration of a winding river. The river is depicted as a blue, wavy line that flows through various scenes. The scenes include a dam, a boat, a person fishing, a person using a net, a person using a pump, and a person using a hose. The background is a light blue and green gradient. The text 'D'AMONT EN AVAL' is written in large, bold, blue and black letters at the top right. Below it is the Ramsar logo, which consists of a green square with a white wavy line and the word 'Ramsar' in white. A red dashed border surrounds the text 'Les zones humides nous relient les uns aux autres'.

**D'AMONT
EN AVAL**

**Les zones humides
nous relient les uns
aux autres**

5 priorités en Europe : quelles enjeux pour les bassins fluviaux ?

1

rétablir les connections d'amont en aval (et vice versa)

sources
rétention
dépollution
poissons

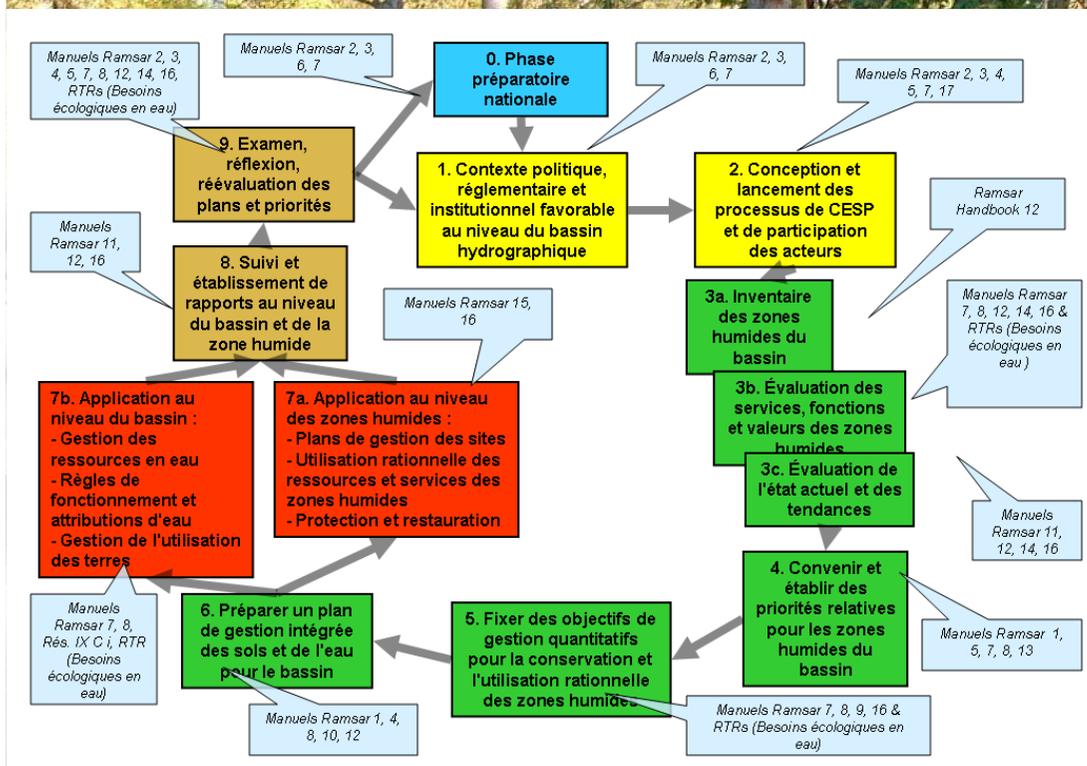

A photograph showing a flooded area. In the background, a large blue and white boat is docked. A blue metal staircase leads from the foreground into the water. The water is murky and reflects the sky. There are green plants and trees in the foreground and background. The overall scene suggests a flooded area, possibly a wetland or a riverbank.

2

**inondations
biodiversité
prairies humides
pâturages**

restaurer les connexions latérales dans les plaines fluviales

> exemple d'un outil Ramsar
lier la gestion du bassin avec celle de ses zones humides
le chemin critique

4

**énergies
navigation**

**urbanisation
migrations
extractions**

offrir l'espace pour permettre une dynamique

5

constructions
dérangements
conflicts d'usages
écosystèmes liés à l'eau
bassin versant

lieux de détente, loisirs, sports et tourisme

Regard sur le Plan Loire...

> un modèle pour d'autres ?

> des défis à relever

> utiliser les outils
